INSTALLATION

1. Refer to the Service Manual and follow the instructions under Stripping the Motorcycle for Top End Repair.
2. Follow the Service Manual instructions to remove the rocker covers and cylinder heads.

3. Using Valve Spring Compressor (HD-3436-B), compress the valve springs and remove upper collar keys, upper collar, and lower collar on all four valves.
4. If re-using the existing valves, use a fine tooth file to remove any burrs on the valve stem at the retainer groove. Mark the valve to ensure that it will be reassembled in the same head.
