

INSTRUCTIONS

-J04573

REV. 2011-06-03

FRONT MAGNUM 5 WHEEL

GENERAL

WARNING

Install only wheels and installation kits approved for your model motorcycle. Contact a Harley-Davidson dealer to verify fitment. Mismatching wheels and installation kits or installing wheels not approved for your model can cause loss of control, which could result in death or serious injury. (00610c)

Kit Number

43621-09, 40806-09, 40516-10, 40125-10, 43300049, 43300051

Models

For model fitment information, see the P&A Catalog or the Parts and Accessories section of www.harley-davidson.com.

NOTE

Accessory hub caps are not compatible with this wheel.

Kit Contents

This kit includes the custom wheel only.

Additional Parts Required

Proper installation of this kit requires the separate purchase of the following parts which are available at a Harley-Davidson dealer:

- Wheel Installation Kit (See Table 3 through Table 8 to determine required installation kit.)
- Brake Disc Screws (See Figure 1 and Table 1.)
- Wheel Bearing Remover and Installer (94134-09A)
- If installing on a Dyna model with an original equipment laced front wheel, separate purchase of stock brake disc (44553-06A) or polished brake disc (41500012) is required.

WARNING

The rider's safety depends upon the correct installation of this kit. Use the appropriate service manual procedures. If the procedure is not within your capabilities or you do not have the correct tools, have a Harley-Davidson dealer perform the installation. Improper installation of this kit could result in death or serious injury. (00333a)

NOTE

This instruction sheet references service manual information. A service manual for your model motorcycle is required for this installation and is available from a Harley-Davidson dealer.

Recommended Additional Parts

It is recommended that a floating brake rotor be purchased separately if objectionable brake noise is experienced from the brake rotor. Refer to the P&A Retail Catalog or the Parts and Accessories section of www.harley-davidson.com for part numbers.

The following Harley-Davidson Genuine Motor Accessories are recommended for proper maintenance and cleaning:

- Harley® Bright™ Chrome Cleaner (94683-99)
- Harley® Glaze™ Polish and Sealant (99701-84)
- Harley® Wheel and Spoke Brush (43078-99)
- Harley-Davidson® Wheel and Tire Cleaner (94658-98)
- Harley® Preserve™ Bare Aluminum Protectant (99845-07)

Figure 1. Front Brake Disc Styles

Table 1. Front Disc Hardware Fitment

Brake Disc	Hardware
Closed disc	5 Stock disc screws (3655A)
	Chrome screw kit (46646-05) includes 5 screws
Open disc	5 Stock disc screws (3762M) and 5 disc washers (6966M)
NOTE: Models equipped with dual front brakes and models being equipped with a wheel with dual brake mounting surfaces require twice as many screws/washers (10 total screws or 2 chrome screw kits if available).	

INSTALLATION

NOTES

Prior to removing or installing the wheel, the front brake caliper must be removed.

Use plastic protectors on the tire mounting tools and rim clamps when mounting a tire to a painted wheel.

For wide low profile tires, a tire mounting machine with a second arm to press down on the sidewall while the wheel is rotating is recommended.

When mounting tires, liberally use tire lube on the wheel and tire.

For tire removal, use plastic inserts between the rim and tire after breaking the bead to create a large enough gap for the rim clamps.

1. Remove existing front wheel assembly. Save axle, axle nut and wheel spacers for kit installation. Refer to FRONT WHEEL in service manual.

If replacing a Dyna stock cast wheel, save the open-style brake rotor for future use.

NOTICE

Do not re-use brake disc/rotor screws. Re-using these screws can result in torque loss and damage to brake components. (00319c)

NOTE

For Kits 40806-09, 40125-10 and 43300051: Install short valve stem (43157-83A) included in the installation kit.

- For 2006 and later FXDWG Models: When correctly installed, the tire will be 0.08-0.2 in (2-5 mm) off of center, compared to the fender.

For Kits 43621-09, 40516-10 and 43300049: Install long valve stem (43206-01) included in the installation kit.

2. See Figure 2. Install valve stem assembly (L or M) on wheel. Refer to TIRES in service manual.
3. Assemble wheel installation kit components and brake disc(s) to wheel, using the appropriate service parts table. Refer to FRONT WHEEL in service manual.

NOTES

For 2007 and later Softail models or 2008 and later Dyna models: Install the bearing shim indicated in the service parts table for your year and model motorcycle.

Install the primary bearing first with the WHEEL BEARING REMOVER/INSTALLER, following the service manual instructions.

The brake mounting surfaces on the left side of the wheel indicate the primary bearing side.

4. Install wheel assembly parts from the appropriate service parts table for your fitment and stock brake disc(s). Discard parts from the installation kit that are not required. Refer to FRONT WHEEL in service manual.
5. Mount and balance tire.
6. Install wheel spacer (H) previously removed.
7. Install front wheel (1), stock axle and stock axle nut. Refer to FRONT WHEEL in service manual.

MAINTENANCE AND CLEANING

Chrome parts must be maintained regularly so they keep their original shine and luster.

1. Clean heavily-soiled wheel surfaces using Harley-Davidson Wheel and Tire Cleaner, applied with Harley Wheel and Spoke Brush.
2. Thoroughly clean chrome with a good quality chrome cleaner, such as Harley Bright Chrome Cleaner.
3. After cleaning and polishing, seal the finish with a good quality sealer, such as Harley Glaze Polish and Sealant.

SERVICE PARTS
