⚠ WARNING

The rider's safety depends upon the correct installation of this kit. If the procedure is not within your capabilities or you do not have the correct tools, have a Harley-Davidson dealer perform the installation. Improper installation of this kit could result in death or serious injury. (00308a)

Kit Contents

This kit contains one windshield.

REMOVAL

1. See Figure 1. Remove the two inner screws (3) and nylon washers (4). Loosen outer screws (3).
2. Remove windshield. Leave the rubber trim strip (2) in place.

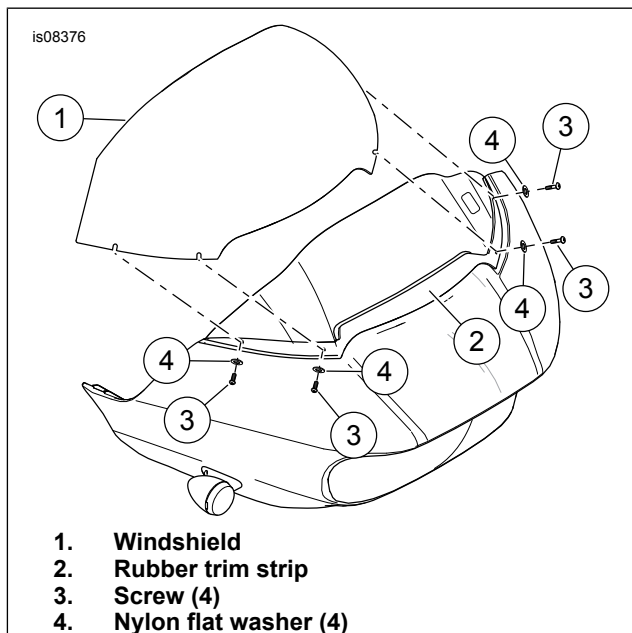

Figure 1. Windshield Installation

INSTALLATION

1. Put the windshield into position. Install the mounting screws (3), with the nylon washers (4). Make sure that the nylon washers are outside of the windshield.
2. Tighten mounting screws from the center to the outside edge on both sides. Tighten screws to 0.9–1.3 N·m (8–12 in-lbs).

CARE AND CLEANING

NOTICE

Polycarbonate windscreens/windshields require proper attention and care to maintain. Failure to maintain polycarbonate properly can result in damage to the windscreen/windshield. (00483d)

- Do not use benzene, paint thinner, gasoline or any other type of harsh cleaner on the windscreen/windshield. Doing so damages the surface.
- Do not clean in hot sun or high temperature.
- Powdered, abrasive or alkaline cleanser damages the windscreen/windshield.
- Sunlight reflections off the inside curvature of a windscreen/windshield can, at certain times of the day, cause extreme heat build-up on motorcycle instruments. Exercise care in parking. Park facing the sun, place an opaque object over the instruments, or adjust the windscreen/windshield to avoid reflections.

NOTE

Harley-Davidson Windshield Water Repellent Treatment (Part No. 99841-01) is approved for use on Harley-Davidson polycarbonate windshields.
