### LIMITED WARRANTY

Kuryakyn warrants that any Kuryakyn products sold hereunder, shall be free of defects in materials and workmanship for a period of one (1) year from the date of purchase by the consumer excepting the following provisions:

- Kuryakyn shall have no obligation in the event the customer is unable to provide a receipt showing the date the customer purchased the product(s).
- The product must be properly installed, maintained and operated under normal conditions.
- Kuryakyn makes no warranty, expressed or implied, with respect to any gold plated products.
- Kuryakyn shall not be liable for any consequential and incidental damages, including labor and paint, resulting from failure of a Kuryakyn product, failure to deliver, delay in delivery, delivery in nonconforming condition, or for any breach of contract or duty between Kuryakyn and a customer.
- Kuryakyn products are often intended for use in specific applications. Kuryakyn makes no warranty if a Kuryakyn product is used in applications other than intended.
- Kuryakyn electrical products are warranted for one (1) year from the date of purchase by the consumer. Components of Kuryakyn products containing L.E.D.s will be warranted for defects in materials and workmanship for 3 years from the date of purchase.
- Kuryakyn makes no warranty of any kind in regard to other manufacturer's products distributed by Kuryakyn. Kuryakyn will pass on all warranties made by the manufacturer and where possible, will expedite the claim on behalf of the customer, but ultimately, responsibility for disposition of the warranty claim lies with the manufacturer.

### ABOUT OUR CATALOG

You'll find all our innovations for H-D, GL and Metric Cruisers in our annual catalogs. Order online today—select the "CATALOGS" icon. Each Kuryakyn product comes with a Proof-of-Purchase good for a complimentary catalog. Details in packaging.

Be sure to ask your local dealer about other Kuryakyn products, the motorcycle parts and accessories designed for riders by riders.

## PROCEDURE

**STEP 1** Remove the stock oil line cover by removing the two fasteners labeled A and B in [PIC.1](#).

**STEP 2** Install the larger of the two Stand-off Studs where fastener B was previously installed being careful not to over-tighten the Stand-off Stud.

**STEP 3** Remove the OEM socket head cap screw from the electronic speedometer sensor shown in [PIC.2](#). Replace this fastener with the smaller Stand-off Stud being careful not to over tighten.

**STEP 4** Remove the OEM fastener from the transmission trap door located directly in line with the transmission dipstick labeled as C in [PIC.1](#).

**STEP 5 OPTIONAL STEP.** Remove the OEM wiring harness hanger from the OEM oil line cover and secure it to the webbed boss on the back side of the new Transmission/oil Line Cover using the supplied 10–24 x 3/8" Button Head Cap Screw and the # 10 External Tooth Lock Washer.

**STEP 6** Slip the cover into place. The lower portion of the Transmission/oil Line Cover will go behind the clutch cable. These are close quarters so it may take more than one attempt to maneuver the cover into position. The cover will NOT require any bending or twisting to get it in place.

**STEP 7** Loosely install the supplied 1/4"–20 X 5/8" Socket Head Cap Screw, Wave Washer (.267 x .423 x .008) and Flat Washer (.250 x .428 x .062), in the front of the cover.

**STEP 8** Loosely install the supplied 10–24 x 3/8" Socket Head Cap Screw, #10 Stainless Steel Wave Washer and Flat Washer (.207 x .288 x .045) in the rear of the cover at the electronic speedometer sensor.

**STEP 9** Loosely install the supplied 1/4"–20 x 1-3/4" Socket Head Cap Screw, Wave Washer (.267 x .423 x .008) and Flat Washer (.250 x .428 x .062), in the hole in the middle of the cover.

**STEP 10** Once all three fasteners are loosely installed, go back and tighten the middle fastener to 7–9 foot-pounds and the front and rear fasteners snugly. DO NOT over-tighten the front and rear fasteners.

**STEP 11** Push the supplied Hot Spots into the two 1/4" Socket Head Cap Screws visible on the face of the cover.

**STEP 12** If you opted to re-install the OEM wiring harness hanger in STEP 5, lift the wiring harness into the hanger using a screwdriver or similar length tool from underneath the motorcycle.

*Ride On!*
