## SECURING MOTORCYCLE

Always lock your Harley-Davidson® motorcycle anytime you are away from it, including at home. Lock it when it is in the garage, in your yard, in a parking garage, on a trailer, even at the store. Beware. To protect against lift-away and tow-away theft, as well as roll-away and ride-away theft, always lock your vehicle to a fixed immovable object that is cemented or otherwise anchored to the ground. Feed the chain links around a fixed object and through the frame of the motorcycle. Position your lock keeping the lock raised off the ground with the key mechanism facing downwards to prevent thieves from attempting to leverage or crush the lock.

For maximum security in higher theft areas or for long periods of time (even in a garage), use both a Harley-Davidson® Chain and Padlock and a separate Harley-Davidson® Disc lock together. Lock the Harley-Davidson® Disc lock onto the front or rear rotor/disc. Place Harley-Davidson® Chain and Padlock around a fixed object and through the frame of the motorcycle.

- Lock your motorcycle in a well lit areas.
- Create a snug fit with frame and or wheels so that there is little room in the chain links for thieves' tools to get leverage.
- Lock your motorcycle to an object that is securely bolted or cemented to the ground, and that has something affixed to the top to prevent thieves from lifting the lock over the top of the object.
- Do not lock your motorcycle to itself, or to objects that can be easily cut, such as small trees, aluminum or wooden posts or chain link fences.
- Do not lock motorcycle in the same area all the time.
- Keep motorcycle locked at all times.
- Do not leave motorcycle unguarded without being locked.
